② `<div>`

1) Block Element
2) supports align Attribute, div tag displayed in new line.
3) this tag is used to wrap a section for highlighting that section.

`<span>`

1) Inline Element.
2) No Align attribute, does not begin a new line.
3) this tag is used to wrap any specific words that we want to highlight in our webpage.

Ex:-
```
<body>
    <div> Ashu </div>
    <div> AshuX</div>
    <div>XAshuX</div>
</body>
```

O/P.

| Ashu |
| AshuX |
| XAshuX |

Ex:-
```
<body>
    <P>Abs<span>Ashu
    </span>ent</p>
</body>
```

Ex:-
```
<body>
    <P><span style="back
    ground-color:green">
    Ashu </span>tosh
    </P>
```

O/P.
Ashutosh

Green ← color.
